Maintenance + Care Report

We're taking care of it.

Hello ,

Your website is in good hands! This report gives you a detailed breakdown of the maintenance performed on https://example.com recently to keep your site secure, fast, and running smoothly.

What this means for you:

- Maximum uptime – Your site was online and accessible to visitors.
- Stronger security – Updates and monitoring helped protect against threats.
- Better performance – Optimizations kept everything running smoothly.
- Reliable backups – Just in case, your data is safe and recoverable.
- Theme + plugins updated – Stay up-to-date with the latest software.

Regular maintenance prevents issues before they happen, ensuring your visitors always have a seamless experience.

Have questions or need assistance? Feel free to reach out anytime.

It's a privilege working with you keeping your website in top shape!

Best,
Dani + the kaleidaweb team

Overview

Everything you need to know about your site.

Updates

Updates

We continuously keep your site up to date.

In the WordPress technology ecosystem, updates are crucial to maintaining optimal performance and strong security.

Last plugin updates

Plugin	Version	Updated On
WP Rocket	3.12.3 > **3.12.4**	April 04, 2025

Backups

The only way to protect yourself in tough situations.

A backup is your primary guarantee that your website can be fully restored after an outage. Backups are invaluable if you accidentally delete important elements, or if your website is hacked. We always keep multiple backups of your site and are ready to restore back anytime.

Uptime

Uptime & Performance Data from Google PageSpeed Insights.

Uptime

Downtime happens more often than people think. That's why we constantly monitor your website to make sure that we are the first to know that your website is down, so we can fix it before your consumers even notice it!

| Status	Up	Uptime rate	100.00%

Performance

It's important to have a website that is always online and performing well.

Performance

Performance is key to having a fast and efficient website. When a visitor opens a site for the first time, they expect it to load within 3 seconds. A great first impression is crucial for online businesses, as speed plays a decisive role in shaping how a brand is perceived on the web.

89

◆ 0-49   ■ 50-89   ● 90-100
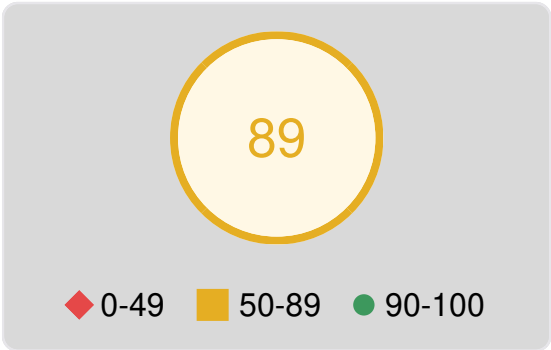

● **First Contentful Paint (FCP)**
Time it takes for the first visible element to appear on the screen

0.9 s

● **Time to Interactive (TTI)**
Time it takes for the page to become fully usable and responsive.

0.9 s

● **Speed Index**
Measures how quickly the visible parts of the page are displayed during loading.

0.9 s

● **Cumulative Layout Shift (CLS)**
Tracks unexpected layout shifts to ensure a visually stable experience.

0

● **Total Blocking Time (TBT)**
The total time during loading when the page is unresponsive to user input.
